DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, and 5-17, drawn to a method for detecting a hapten in a sample.

Group II, claim(s) 4, and 19-31, drawn to a method for detecting a hapten in a sample using a rapid flow-through inhibition assay formation.

Group III, claim(s) 18 drawn to The Surface Plasmaon Resonance based immunoassay format method.

The inventions listed as groups I-III do not relate to a single general inventive Concept under PCT Rule 13.1 because, under PCT Rule 13.2 they lack the same or corresponding special technical features for the following reasons: Claims 1-3 and 5-17 requires providing a flow of sample containing hapten and pre-determined amount of a first moiety separately and Groups II and III do not require these limitations. Also, Group I requires detecting the amount of first moiety bound to second moiety whereas Group II requires detecting the amount of binding partner bound to the hapten derivative and Group III requires plotting concentrations of free hapten versus average response of binding partner. Further, Group II requires immobilized hapten derivative on the surface of an optical biosensor chip and also requires excess free antibodies, and a

specially designed bioconjugate for the antibodies and Groups I and III do not require these limitations. Group III requires equilibrium solution and injecting regeneration buffer and plotting concentrations of free hapten versus average response of binding partner-nanoparticle conjugate to provide an assay standard curve and Groups I and II do not require these limitations. Thus, there are three different methods requiring different method steps and different reagents. Under Rule 13 Applicant is entitled to one product, one method of making and one method of using.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
